Project Experience

December 2024 - December 2025

● Details - Unreal R&D Generalist

Can You Eat It?

- Researched Unreal's Control Rig plugin and prototyped various character rigs.
- Implemented custom dialogue UI using C++
- Communicated with writers & designers on the team, implementing additional markup features for the dialogue system based on their feedback.

September 2023 - May 2024

● Stardust Salvager - 3D Platformer Prototype

Solo Project

- Designed and iterated on platforming features and crafting / building mechanics
- Regularly conducted playtests, recorded and acted on feedback
- Developed a custom ability system in C++
- Recreated PS1 / N64 era rendering effects and custom lighting in Unreal
- Fully modelled, textured and animated player character

January 2023 - April 2023

● Project ReMix - Freelance

PrimeCut Productions

- Took on the role of Lead Programmer in a small team, working to develop an app that would be used in interactive story-building workshops.
- Designed and implemented a fully featured character customization system, along with UI.
- Communicated with client in regular meetings, taking on-board feedback and providing insight on feasibility of different features.
- Tested and deployed the prototype to iOS devices

April 2023 - September 2023

● Maritime Trail App - Freelance

University of Ulster

- Designed and implemented UI / UX
- Developed prototype for viewing maritime exhibitions in Augmented Reality
- Assisted with scanning and importing of exhibition models
- Implemented localization support for English and Irish language options
- Tested and deployed the prototype to Android devices

About Me

Hey there! I'm a Game Design graduate from Ulster University who specializes in design and programming. Working on games is my favourite outlet for creativity, and I'm especially drawn to experiences with unique styles and gameplay.

The problem-solving of implementing new kinds of mechanics and systems is something I really enjoy, and over the last 4 years I've had the chance to develop those skills across a wide variety of projects.

I'm super eager to take that learning even further, and excited to work alongside others who are just as passionate.

Technical Skills

Unreal

Blender

GitHub

Gamemaker

Photoshop

Programming:

- C++
- Blueprints
- Python
- GML
- C#
- HTML

Education

Ulster University

- Games Design - BDES (Hons) 2020 - 2024: First-Class Honours
- Awarded Dean's List 2020 - 2021

Belfast Met

- Access Diploma in Computing, Business and Multimedia 2019 -2020: Distinction
